- [NationalHero](#)
- [GDBOT](#)

PROFILE

I am a 19-year old full-stack developer from Bulgaria with a strong focus on building reliable, high-quality software.

I am currently a first-year Computer Science student at the Technical University of Sofia, with a solid interest in mathematics and analytical problem-solving. I am also currently a part of the SAP Mentorship program.

WORK EXPERIENCE

Freelance Developer

2021-

- I have experience as a freelance developer at The Cantina, working mainly on Discord and Telegram chatbots and selling them to third-party organizations. I was responsible for designing, developing, deploying, and maintaining custom bot solutions, collaborating with clients to translate requirements into scalable, production-ready features.

SoftUni

2024

- I participated in SoftUni's exam tester program, ensuring quality standards for Python track assessments by reviewing problem statements, validating edge cases, and verifying unit test correctness and coverage. This experience enhanced my ability to deliver results in a client-focused environment under tight deadlines.

Nemetschek

2025

- I participated in the SpeedITUp program at Nemetschek, collaborating with 7 other participants on a real project within a corporate environment. Through this experience, I developed skills in Agile methodology, team collaboration, and professional business operations.
